<b>Office Action Summary</b>	<b>Application No.</b> 10/738,351	<b>Applicant(s)</b> SEPETKA ET AL.	
	<b>Examiner</b> Kevin T. Truong	<b>Art Unit</b> 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 04 February 2008.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

### **DETAILED ACTION**

Note: This is in response to an amendment filed 02/04/2008.

#### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 39-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wensel et al. (U.S. 5,895,398) in view of Chee et al (U.S. 5,304,194).

Wensel et al discloses the claimed invention except for at least one strand extends along the coil elongate obstruction removing element (18,30). However, Chee et al teaches in figures 1 and 2, that it is known in the surgical art to have coil configuration having at least one strand. For this reason, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the at least one strand extends along the coil elongate obstruction removing element as taught by Chee et al to enhances the ability of the coil to facilitate embolization.

#### ***Response to Arguments***

Applicant's arguments filed 02/04/2008 have been fully considered but they are not persuasive. In response to applicant's argument that Chee teaches adding fibers to an embolic coil to promote embolization and clot formation within aneurysms and the like which is contrary to Wensel, namely to open blood vessels by removing clots and

embolic material (same as the claimed invention) rather than promoting embolization at a vessels site. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Wensel et al discloses the claimed invention except for at least one strand extends along the coil elongate obstruction removing element. However, Chee et al teaches in figures 1 and 2, that it is known in the surgical art to have coil configuration having at least one strand. For this reason, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the at least one strand extends along the coil elongate obstruction removing element as taught by Chee et al to enhance the ability of the coil to facilitate embolization.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3734

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
